Education

University of Michigan - Ann Arbor, MI

May 2026

Bachelor of Science in Computer Science

GPA 3.84

- **Relevant Coursework:** Data Structures and Algorithms, Web Systems, Discrete Math, Computer Organization, Foundations of Computer Science, Computer Security, Programming & Data Structures

Experience

Next Play Games

May 2024 – August 2024

Software Engineer Intern

San Mateo, CA

- Introducing a fantasy style baseball game on web and mobile by developing **6** client-side pages using **React**, **CSS**, **Typescript**, **React Native**, and **Figma**.
- Orchestrating a **Postgres** database to manage backend services for **2,087** athletes and **30** MLB teams by utilizing **Node.js** & **Express.js** to create **8** REST API endpoints for delivering live stats, projections, and news.

University of Michigan, Info & Tech Services

Jan 2024 – Apr 2024 & Aug 2024 – Dec 2024

Software Engineer Intern

Ann Arbor, MI

- Accelerating image workflow by **66%** for over **50** web developers by building **3** plugins that automatically generate alt text via **AI**.
- Generating industry standard alt text by leveraging **Microsoft Azure AI Vision** & **OpenAI GPT-4V** services within **WordPress**, **Drupal**, and **Google Slide** platforms.

Infinite Degrees

Aug 2024 – Dec 2022

Software Engineer Intern

Ann Arbor, MI

- Assigned snowboarding skill rating to **87** active users by accessing **MySQL** database via **Node.js** to run a machine learning algorithm on user uploaded tricks and routines.
- Quantified an individual's skill rating by devising a **TensorFlow** regression model that weighs **398** snowboarding tricks on difficulty. Validated model's accuracy by executing a script on **101** athletes: <https://idx.style/rankings>.

Projects

NFL Spread Predictor | *Python, HTML, CSS*

- Engineered a dataframe of **304** metrics for all NFL games in the past **7** years by leveraging **Selenium** and **Pandas**.
- Predicted score differential of future games by building a **neural network** with **TensorFlow** library & dataframe.
- Accomplished **58%** win rate and finished **+25 units** against DraftKings spread from week 10 to SuperBowl.
- Shared weekly picks by scripting a static site generator (**Jinja2**): https://kushal5294.github.io/nfl_spread.html.

BallotBank App | *Swift, SwiftUI*

- Launched a fully **decentralized voting platform** by engineering a **mock blockchain** via **MongoDB** to store classified data, ensuring fairness, immutability, and encryption for users: https://kushal5294.github.io/ballot_bank.html.
- Assembled an informative iOS **investing platform** by displaying live crypto valuations for over **10,000** cryptocurrencies, focusing on top **100** coins and spotlighting top **5** fastest growers via CoinGecko's API.
- Enabled users to display live portfolio worth, view analytical charts, & track assets by logging personal **crypto wallet**.

Search Engine | *Python, React, HTML, CSS, AWS*

- Created **Hadoop** style MapReduce server by employing **TCP** and **UDP** sockets and threading to facilitate manager to worker protocol and fault tolerance.
- Built **inverted index** of **2,936** Wikipedia pages by running the tf-idf algorithm through **MapReduce** pipeline.
- Delivered top **10** page hits by creating **Flask** REST API that consults inverted index & PageRank score.
- Constructed frontend UI & deployed to **Amazon Web Services**: https://kushal5294.github.io/search_engine.html.

Skills

Languages: Python, C++, JavaScript, Typescript, React, Swift, HTML/CSS, Java, SQL, PHP, Bash

Technologies: Pandas, Flask, Hadoop, TensorFlow, Docker, Node.js, AWS, MySQL, PostgreSQL, MongoDB, FireBase

Concepts: OOP, Web Development, CRM, Enterprise Software, Machine Learning, Cloud Computing, Computer Vision
